Grand Trunk Llismanagement.

The recent report of Mr. CHAPMAN, before Trunk, in England, has drawn aside the curtain, to some extent, on the affairs of the company, exhibiting the most colpable mismanagement, and revealing a state of things completely justifying those journalists who have from the beginning charged its managers with corruption. It will be remembered that Mr. CHAPMAN came to this country with the epecial object in view of making enquiry regarding the affairs of the Company, and the way it had been managed. Read his report from which we make the following extract, No wonder the whole concern is bankrupt .-No wonder fresh demands are made yearly from the people of Canada. Thousands have been spent to benefit prieste individuals, and make political capital a Why should the people of this province be called upon to pay for such gross extravogence as reported by Mr.

CHAPMAN 1 --" Proceeding to consider the evidence on which his charges were bised, Mr. Chapman revealed several instances, as he alleged of gross mismanagement and corruption in the working of the line. He stated, with respect to the station at Sarnia, that the Company had been made to pay £24 000 for ewampy land which only cost £240, and the land was no use when they got it, and not all the money of all the capitalists of Europe could make it of use. In one part of Mr. Blackwell's report he had substituted £50,000 000 sterling for the same number of dollars. Another paragraph alluded to the rast increase population in a certain district traversed by the line, while the fact was that there was no swamp which was inhabited by immense publish this protest. numbers of rattlesnakes (laughter) He showed that agreements had been entered into by which the Grand Trook was prevented from having a share in the New York traffic; vent it trespassing on the line. There could be no doubt that the country possessed from derful resources, and the only thing wanted the Great Western of Canada was a most dissections offsir for the Company, and the steamboat charlet was equally disastrous The Corporation of Kingston had offered the company the whole of one wide street to run their trains through. That offer was reject. ed, because it would not have compensated certain parties smonget whom was a Mr. Shaw, . That person's wharf was mortgoged for £10,000, but the trade having gone away many dollars. The Company gave Mr. Shave for endning scross his wharf £15,1.00, and was one of the Ministers of Canada, (shame. That was not a statement based on mere ru-

from the town the place was worth perhaps as mor. Like all the other allegations he had on the spot. The undertaking was denounced as a grossly mismanaged concern' by all jistties. Its influence was used for political purposes and for the control of votes. He hoped that no premature legalaction would be taken by any section of proprietors which might have the effect of throwing the concern into Chancery; and, after warning the meeting against dangers to be avoided, Mr. Chapman concluded his address.

The forester and manafecturer of "Jedeba's Mone tale Hest Pitts," has spent the greater part of his life in traveling, having visited nearly every country to the world. He spent over six years among the Indians of the Rocky Monetales and of Merico, and it was thus that the "Moneyass lieux Putts" were discovered. A very interesting account of his adventures there, you will find in any Almanac and Pamphlet.

PERURE BLOOD!

The blood is the life | and when any foreign or unhosity teatler gots mined with it, it is at once distributed to every organ of the body. Every never feels the poison and all the vital ergens quickly complain. The stomach will not digest the food particuly. The liver ceases to necrois a sufficiency of bile. The action of the brest is weakened, and so the circulation is feeble. The living become elegred with the poisonous matter; hence, a cough—and all from a slight impurity at the fountinhead of life—the Blood! As if you had thrown same earth, for instance, in a pure spring, from which are a liny rivulet, in a few infantes the whole course of the alrests becomes disturbed and discolored. As quickly does impure blood by to every part, and have its sting behind. All the passages become obstructed, and unless the chatruction is removed, the lamp of life soon dies out. Those pills not only purify the blood, but requirerate all the secretions of the body; they are, therefore, thrivalied as a
